

xorkeesign for Gmail™ privacy policy

xorkeesign Gmail Add-on works on Gmail Apps on Android and iOS devices. It also works on Gmail accessed through browsers.

However the Add-on does not work on Gmail accessed through a tablet or iPad.

Unlike other xorkeesign mail Add-ons, xorkeesign Add-on for Gmail does not enable the users to digitally sign the mails.

Gmail API does not permit signing functionality for the mails sent from the Gmail Application.

However mails that are digitally signed and received from other clients can be verified using this Add-on. This Add-on strictly adheres to [Google API Services User Data Policy](#) for the use of data received through Google APIs. This Add-on also fulfills Gmail's limited use requirements which are given here

Information collected by this Add-on

When you open a mail and click or activate the add-on the following information is accessed using the Google API:

- sender mail address
- recipients mail address
- subject
- mail body
- attachments

Except for the sender's mail address, all information accessed by the add-on stays within the context of the add-on. The add-on uses the sender's mail address as an identifier to the sender's public key given at the time of her registration and perform signature verification. No other information is collected or stored.

To reiterate, we do not share your data with any third parties or AI tools.

Thus, our add-on strictly complies with all conditions specified in the limited use policy of Google.
